

Nearest Vocational Job Finder

Phantom Troupe

Introduction

Nearest vocational job finder is a website which is designed for the people who has difficulty in finding vocational job like Electrician, Plumbing etc. There are people who have relevant skills but don't have the medium to find such jobs. This Platform will help such people to find the jobs in their nearby area related to their skills which will help them to earn money. The existence of such platform are even more required in a situation like covid-19 in which many people have lost their jobs. This web app will also be helpful to job provider as this will also help them to get their work done at reasonable price.

Motivation

In the wake of the global pandemic, there has been a huge disturbance in the service market, both organized and unorganized. The organized sector from some time now has had many platforms (like Monster India, Indeed .etc) to publish and find stable full-time work. But such platforms are not appropriate to post nearby vocational jobs like Plumbing, Electrician, Nursing aides, Carpenters etc. These jobs arise at the need of the hour and current location of the service provider as well as job location is of utmost importance. Our idea is to develop a web application which can act as a middleman for service exchange in these sectors.

Problem Definition

To design a web application which acts as a platform to publish , identify and optimistically match service providers to service receivers based on their location, job start time, previous reviews etc.

Timeline

- Week-0 :(18 Oct, 2020 - 24 Oct ,2020)
 - Gathering requirements and Learning frameworks
- Week-1 :(25 Oct, 2020 - 31 Oct ,2020)
 - Frontend ,UI and Database design
- Week-2 : (1 Nov,2020 - 10 Nov 2020)
 - Backend
- Week-3 : (11 Nov,2020 - 17 Nov, 2020)
 - Testing and Documentation
